Please answer the following questions.

Keep your answer to one page for each question. You are welcome to attach additional material you think is relevant.

How are you contributing to sustainability outcomes in your role, organisation, university, community, or the industry more broadly?

Aotearoa has committed to net zero carbon by 2050 and the built environment has an important role to play. Thinking about the field you're studying or working in; what needs to change to meet this target? Give us some examples of steps we should be taking in Aotearoa.

If selected as NZGBC Future thinker of the Year, how would you use this platform to inspire change?
